DESCRIPTION

When talking about sanitation, we cant ignore the cloth and our body also. But in terms of mist spray on body or fabric it may cause negative impact when inhaled prolonged. Moreover spraying 60% or more alcohol in the tunnel-spraying process quite cost effective, a huge wastage also be there. Keeping these in mind we select the proper compositions of WHO guidelines and introduced 'Sprink MX' for whole body, substance, materials, even drinking water sanitizing practice especially in the context of COVID-19 prevention.

APPLICATION

Sprink MX is a skin and fabric friendly mist spray which is used by spraying methods. A diluted form of this disinfectant liquid with water in 1: 100 ratio can be used sprayed for bode sterilizing through automizer sprayer and by walk through tunnel.
