

FUMIGANT

Packaging: 1liter / 5liter

ORGANIC

Benefits & Fragrance of essential oil

DESCRIPTION

Fumigation is a method of controlling germs, microbes and pests that completely fills an area with gaseous fumigants to suffocate or poison the germs within. This process is very effective to sanitize huge area. We are here with Fumigant, the WHO recommended disinfectant liquid for fogging machine/Fumigator. It kills and eliminates all kinds of microbial life including virus, bacteria, fungi, protozoa, algae. Its totally safe for human, baby and pet's health.

APPLICATION

Fumigate is mainly for Fogging machine. Need to put fumigant liquid directly in fogging machine and go for further process of sanitation.
